NEW ZONING

The City of Seattle voted to rezone the property to a new zoning designation called the "Industry and Innovation zone." This zone aims to promote new development in multi-story buildings that can accommodate industrial businesses along with other dense employment uses like research, design, office, and technology. By offering density bonuses for employment uses, such as office and R&D, in conjunction with industrial uses within the same project, this modern industrial development would facilitate high-density employment near transit stations and existing industrial-commercial areas. **Under this new zoning, buildings could potentially reach heights of up to 240 ft or have a floor area ratio (FAR) of up to 6.5, subject to specific incentive programs.**
