Environmental Summary

Tetrachloroethene (PCE) and other chlorinated solvents are present in soil and groundwater at the site as the result of the former operation of a dry cleaner at the former Scott Cleaners facility. The building that was occupied by the dry cleaners has since been demolished and paved over.

Previous remediation and feasibility testing at the site included subsurface injection of oxidizing materials (Regenox) and excavation (as part of a road widening project). Based upon historical efforts at the site, further remediation would likely include a minimal excavation (depending on the future property use) and injection of a bio-stimulation agent (based on microbial testing results) to the subsurface.

If a regulatory “No Further Action” (NFA; closure letter) is required, a Responsible Party (RP) would need to enter into a Voluntary Cleanup Agreement with the Washington State Department of Ecology (Ecology). Ecology would provide review and direction for the investigation and cleanup of the property.

The estimated costs to obtain an NFA are as follows:

VCA – Ecology Costs:	TBD
Additional Soil Assessment:	\$40,000.00
Soil-Vapor Assessment/Sampling:	\$60,000.00
Groundwater Assessment/Monitoring:	\$60,000.00
Assessment/Monitoring Reports:	\$55,000.00
Remediation Plan Preparation:	\$10,000.00
Remediation Implementation (Multiple Injections):	\$225,000.00
Post Remediation Monitoring:	\$50,000.00
Site Closure/Well Abandonment:	\$80,000.00
TOTAL ESTIMATED ROM COSTS:	\$580,000.00
